

Sharp Imaging, Smart Interface

Sharp Vision, Seamless Control

Precision. Clarity. Security

Prime Detect International, a trusted partner to reputable global X-Ray Manufacturers, delivers a comprehensive portfolio of **high-performance X-ray baggage scanners**, tailored to meet the stringent demands of modern security operations across multiple industries. Each model is selected based on its suitability for the location, threat level, and size of items being screened.

Systems are available in a wide range of tunnel dimensions, including but not limited to:

- **50×30 cm** – ideal for hand luggage and personal items
- **60×40, 65×50, 75×55, 80×65, and 100×100 cm** – for larger baggage and cargo screening needs

These scanners are deployed in a variety of high-security environments such as **Airports, Border Control Points, Government Buildings, Ports, Embassies, Prisons & Correctional Facilities, Data Centers, Hotels, and Oil & Gas sites.**

Our supplied X-Ray scanners are **internationally certified** and **comply with global regulatory safety standards** and comply with 21 CFR Part 1020.40 and the Radiation Emitting Devices Regulations Act (RED Act), including approvals from:

- **TSA** (Transportation Security Administration – USA)
- **ECAC** (European Civil Aviation Conference)
- **ICAO** (International Civil Aviation Organization)

This ensures that Prime Detect solutions are not only technically advanced but also **globally recognized for safety, reliability, and performance.**

In addition, we provide complete Customer Support and **Turnkey Support**, including technical training, installation, operator training, and responsive after-sales service, to guarantee seamless operation and client confidence.
